#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

Art Unit: 3634

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2,3,17 are rejected under 35 U.S.C. 103(a) as being unpatentable over ES Patent No. 1,052,733 in view of ES Patent No. 1,051,839. ES Patent No. 1,052,733 discloses an articulated arm and forearm 10,11 including securing/articulation configurations 6-9,16-20 and a flexible pulling element 14. While ES Patent No. 1,052,733 does not specifically set forth particulars of the securing/articulation configurations as claimed including among other elements an elastic element, ES Patent No. 1,051,839 discloses an articulated awning arm including securing/articulation configurations 1,2a,5-9 (see figure 1) and an elastic element 3, wherein, to incorporate these teachings into the articulate arm and forearm of ES Patent No. 1,052,733 for the purpose of facilitating the movement of the awning would have been obvious to one of ordinary skill in the art.

2. Claims 4-16 are allowed.

3. The applicant states that claim 17 includes features not disclosed nor suggested by the combination of the cited references, namely:

... an arm having a first end and a second end, the first end of the arm including a securing portion adapted for coupling to the fixed support member, the second end of the arm including a surrounding wall portion adapted for articulation ...

Art Unit: 3634

... a forearm having a first end and a second end, the first end of the forearm including a core portion adapted for articulation and coupled to the second end of the arm, the core portion having an orifice extending at least partially through the core portion in a direction transverse to a longitudinal direction of the forearm, the second end of the forearm including a portion adapted for articulation and coupling to the load bar, and the surrounding wall portion of the arm at least partially disposed around the core portion ...

... an elastic element disposed within the arm and secured to a predetermined location on the arm ...

... a flexible pulling element disposed within the arm, the flexible pulling element having a first end coupled to the elastic element and a second end coupled to the core portion of the forearm ...

...bearing means disposed between the core and said surrounding wall, and coaxial with the orifice to guide rotation of the surrounding wall portion relative to the core portion and to support the forearm on the arm.

This is not convincing for ES Patent No. 1,052,733 discloses an articulated arm and forearm 10,11 including securing/articulation configurations 6-9,16-20 and a flexible pulling element 14 while ES Patent No. 1,051,839 discloses an articulated awning arm including securing/articulation configurations 1,2a,5-9 (see figure 1) and an elastic element 3 each of which collectively responds to the claimed limitations.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 3634

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to David M. Purol whose telephone number is (571) 272-6833.

If attempts to reach the examiner by telephone are unsuccessful, the Examiner's supervisor, Brian Glessner, can be reached at (571) 272-6843. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
